

SIMPLE STEPS TO BUILD A WEBSITE

Step 1. Activate the kompozer editor

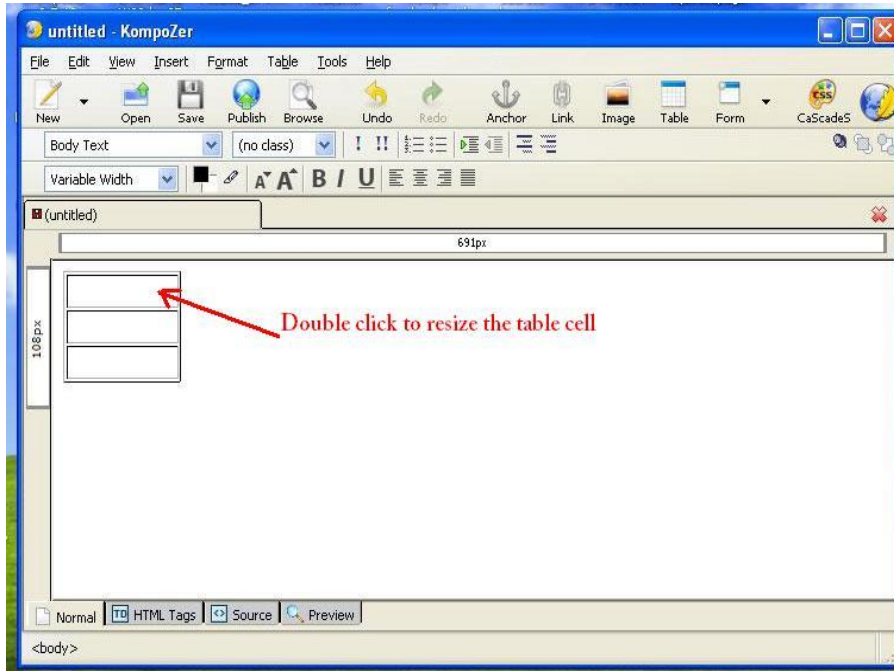

Step 2: Choose the table icon and get the one column and three rows

such as shown below

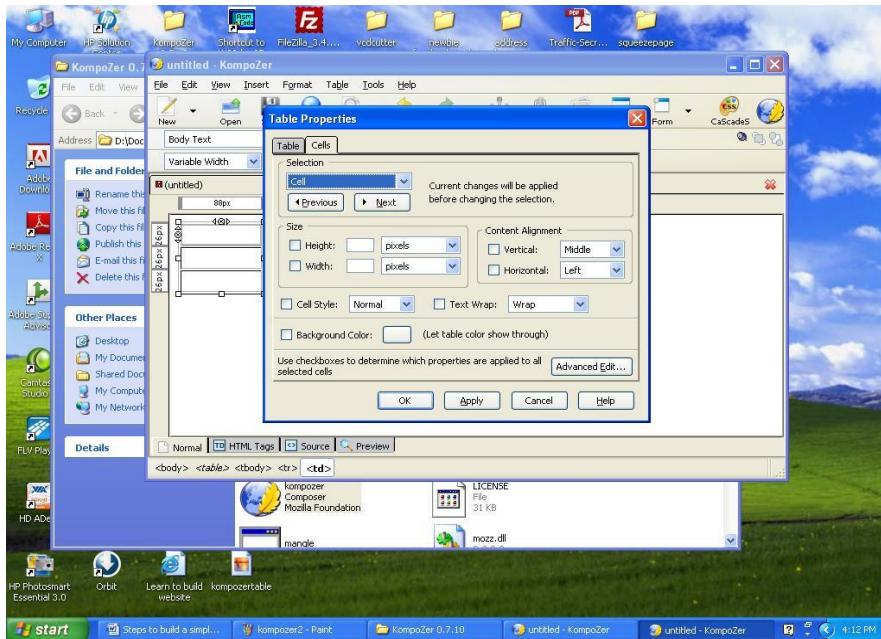

www.internetbusinesssecretsexposed.com

Step3: Double click directly inside the table cell.

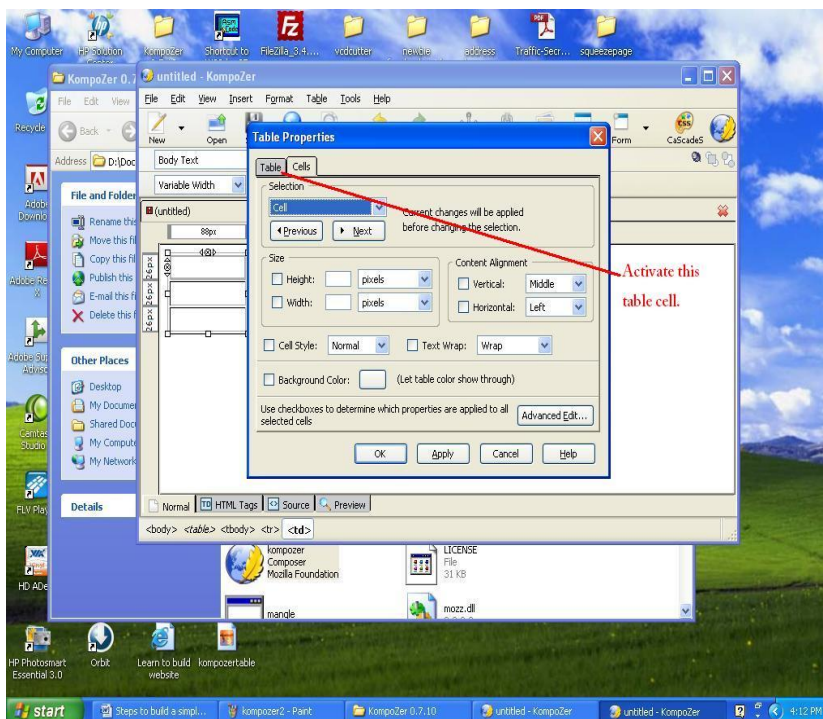

Step4: Activate the table icon by clicking on the icon table.

Here is how you can do it

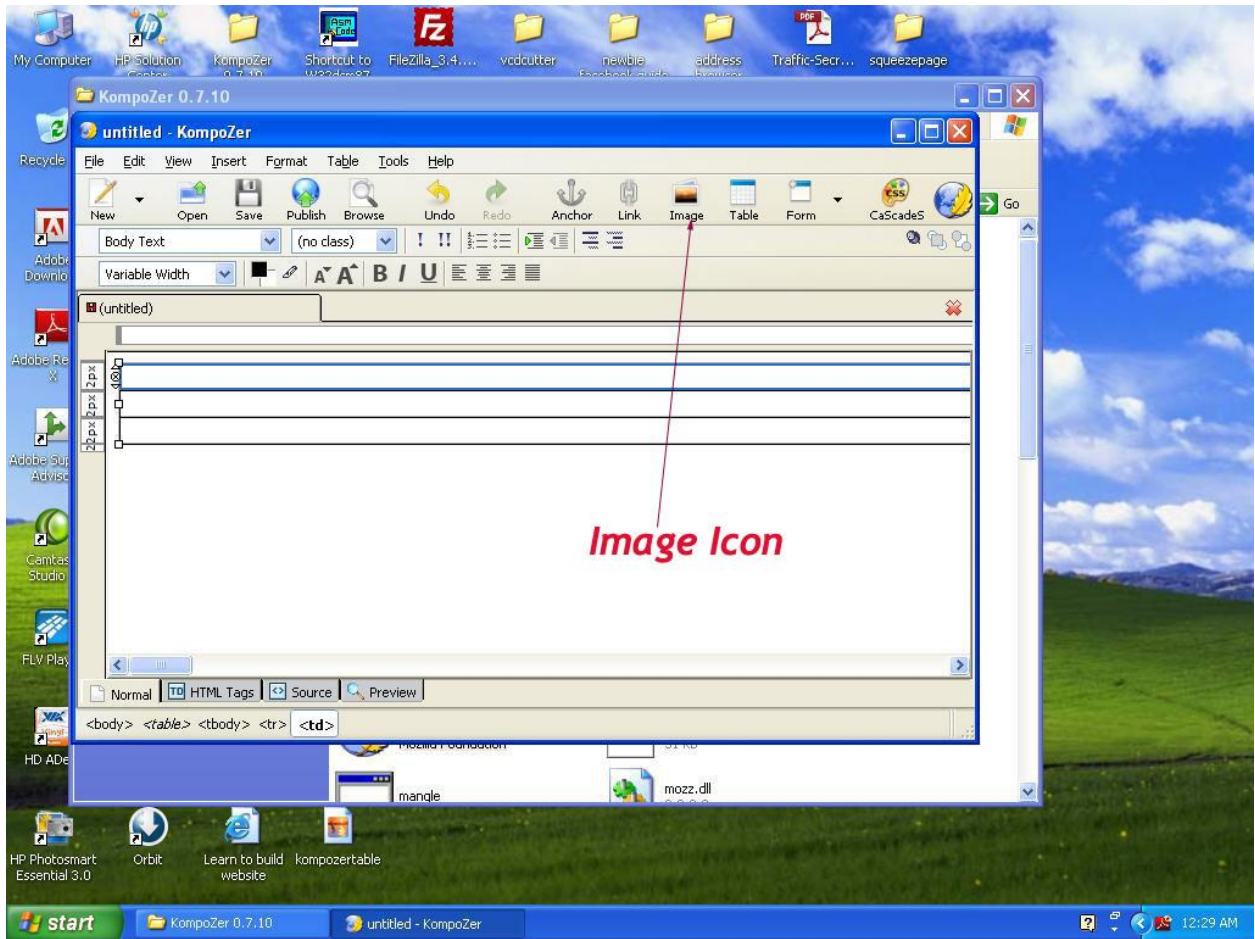

Step5: After activating the table icon, you will get the display as below.

Fill in into width icon with 750 pixels. Change spacing to zero (0) and padding change to zero (0)

www.internetbusinesssecretsexposed.com

The display is shown as below. Now it is your turn to fill in with your prepared header and write something that you wish in the table cell that is prepared.

Step 6: Search for the icon image to fill in the image header into your website.

Check for the size of your image header. If the width is 750 pixels, it is just fine.

If not, you've to check by changing the table width. Note that we've fixed the column width for 750 pixels.

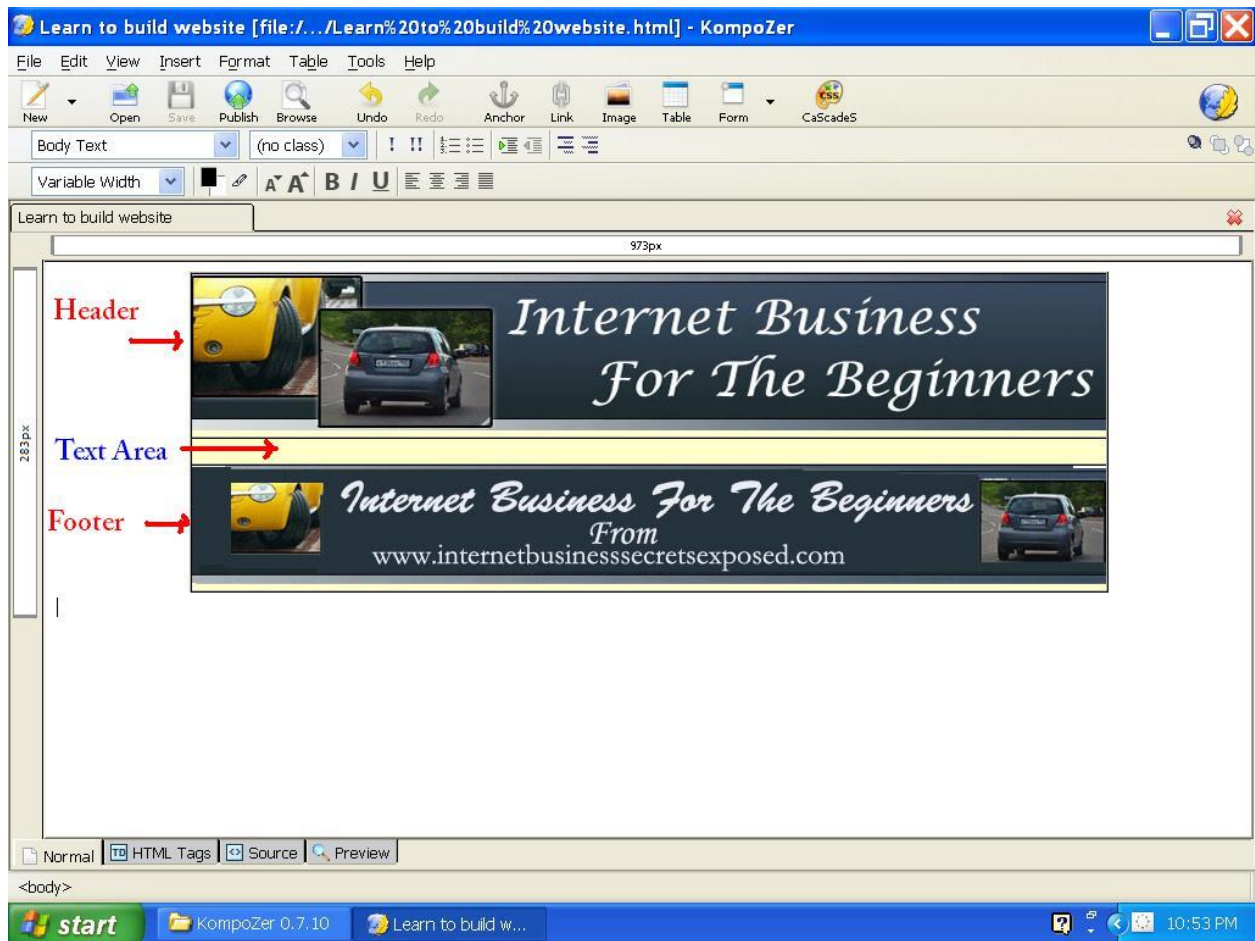

This is the image header. The size is 750x 128 pixels. This image header has to be filled up into the first row of the table.

The simple website has been achieved. If you've already hosted the website, then you can upload all the contents into the server. Make sure that your domain name is something similar to the title of your website. You're asked to create your domain so that nobody has not yet hired.
